

SB 1383 Can Help Save the Planet

Valet Living Can Help Save You Time & Money

What is Senate Bill 1383

The most significant waste-reduction mandate adopted in California in the last 30 years

Applies to all multifamily communities with more than five apartment homes and includes both residents and staff

An "organics program" (food waste) must be implemented for haulers to continue service

Requires California residents to reduce organic/food waste by 75% by 2025

Why Compost Food Waste

Organics/food waste is the largest waste stream in the state, with Californians tossing out more than 6 million tons of food waste every year.¹ Turning food waste into compost reduces greenhouse gas production among many other earth-friendly benefits, including the reduced use of landfills that are rapidly filling up.

Valet Living Can Help You Get Into Compliance with the Law

Provide food waste, recycling, and trash collection with containers that display the correct labels or colors for easy participation

Contact haulers for each waste stream on your behalf

Review your site and program logistics

Provide education on how to properly sort organic waste, recycling and trash into the correct bins

Continuous outreach to existing and new residents

Quarterly business reviews to remain in compliance
